## Huum Sauna stoves

As there are different options to heat your sauna the above costs do not include the stove. We recommend Huum sauna stoves as they look great and are highly engineered. They have global distribution so we recommend you order direct from Huum and commission a locally certified electrician and or wood fired stove fitter. We will guide you all the way with the specification and installation.

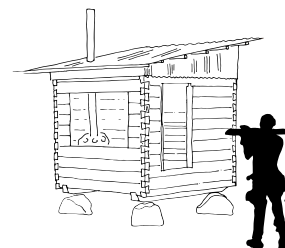

### Authentic wood fired sauna stove (Preferred)

You will require the stove, sauna stones and chimney system.

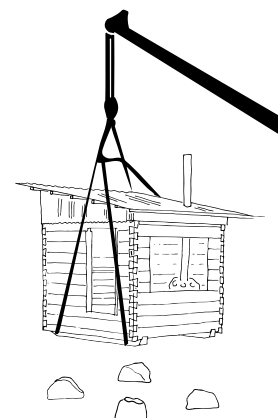

### Electric sauna heaters

You will require a sauna heater, sauna stones, heat reflector and a smart remote control system.
